Kit Includes:
Pumpkin Plastic
50ct Intelligent Pixels x4

Step 1: Install Lights

From the back (picture to the left shows front view) begin pushing the lights through the corrugated plastic following the path for each strand as shown. Connect strand 2 to the end of strand 1 and connect strand 4 to the end of strand 3.

Step 2: Install Pumpkin

Arrange the pumpkins(s) in your yard where you want to set them up. Line up a ground stake or rebar with the green holes and push into the ground, then use zip ties to attach pumpkin to stakes. If you have hard ground, you may need to start a hole with a screwdriver first and use a hammer to sink the stake.

Step 3: Configure Controllers & Connect Lights

There is timing in WowLights Pro Layout Halloween sequences for 2 RGB Pixel Pumpkins and they connect to a WowLights Pixie 16 controller ID #20.

You can set the ID to 20 using the switches on the board 0010 0000 (Switch 3 ON, all others OFF)

Connect the lights to the controller:

Output 1: Tombstone 1	Output 6: Left Pumpkin Strands 1 & 2
Output 2: Tombstone 2	Output 7: Left Pumpkin Strands 3 & 4
Output 3: Tombstone 3	Output 8: Right Pumpkin Strands 1 & 2
Output 4: Tombstone 4	Output 9: Right Pumpkin Strands 3 & 4
Output 5: Tombstone 5	Output 10: Flood Lights
